

GPS-198T TRMS Digital Multimeter with Built-in Thermal Imager.

View thermal and electrical measurements on the same LCD display

- a full-featured digital multimeter
- 50Hz frequency, wide field of view and large aperture thermal imager
- Type K -40°F to 1832°F (-40°C to 1000°C)
- Bluetooth interface with APP software
- IP65 dust and waterproof

Large Aperture Thermal Lens to Read more.

Compact double molded housing with 7.5mm large thermal lens, easy to read more high accurate image.

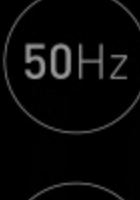

A Full-Featured Digital Multimeter.

Thermal Multimeter is full-featured for thermal and electrical measurements, compatible with iFlex, expands your measurement capabilities—get into tight, hard to reach spaces for current measurement (up to 2500 A AC), easy to read clearly on large LCD display

Built-in Thermal Imager, Fault Location Can be Fixed Quickly.

Built-in thermal imager, instantly spot electrical issues and verify potential issues with trusted readings properly.

-  50Hz High frame rate and easy to capture instant temperature variation
-  View thermal and electrical measurements on the same LCD display
-  The led flashlight

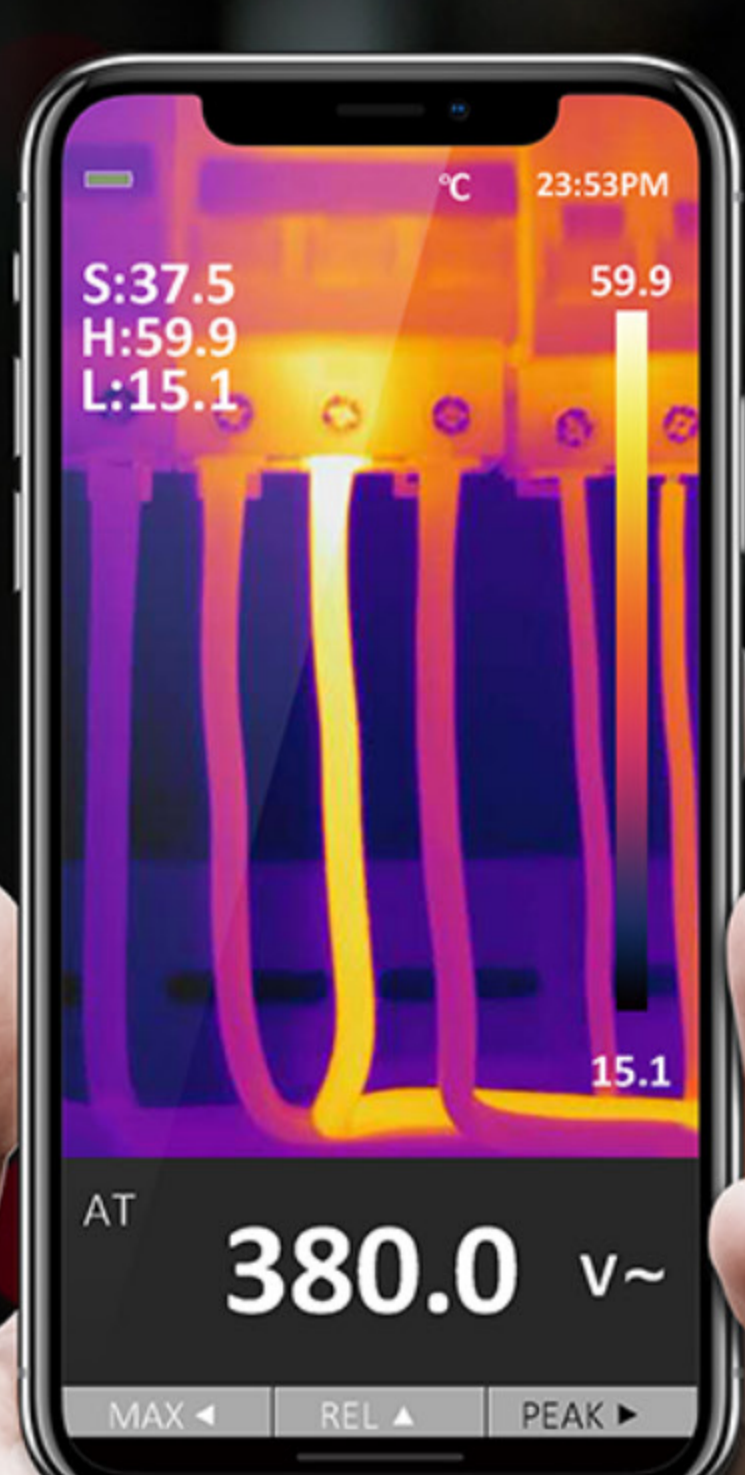

Type k temperature.

Expand your Measurement capability for temperature measuring with Type k probe.

-  Type K -40 F to 1832 F (-40°C to 1000°C)

Bluetooth Interface with APP Software, Read the Realtime Data on Smartphone Conveniently.

IP65 Dust and Water Proof.

2m drop protection, IP65 dust and waterproof extend its service life.
